

Verita offers integrated and holistic risk management solutions

Focused on industry specialization, underwriting acumen and value-added services, Verita takes a comprehensive approach to insurance and risk to provide you with customized risk management solutions.

Today's risks are more severe, inter-connected and complex. New risks arise quickly with little to no warning, and the insurance industry is often challenged to keep pace. Traditional coverage options may be too costly or worse: non-existent. Insurers might not have the understanding necessary to quickly respond to companies' changing risk profiles or the capacity to effectively respond to a rapidly changing risk environment.

Verita is a managing general underwriter with a three-pronged approach to developing insurance solutions aligned with business needs, addressing the complex environment specific to you:

Risk management solutions

Your risk management goals are only as achievable as the superiority and excellence of your carrier's claim adjusting standards and abundance of loss control protocols. In today's world of increasing trends of social (claim) inflation and rising costs of litigation, you want to partner with Verita's claim management team who has bespoke claim practices tailored for your industry. Additionally, Verita's loss control team is always there to help promote a culture of well-being throughout your organization. For every insured, Verita underwriters, claim service team members and loss control specialists are in regular communication among each other and dedicate their efforts toward the intelligent achievement of your risk management objectives.
